Request: Use of coating machine MBCD 1.3-1

Dear Dr. Zimmermann,

we do use the MBCD 1.3-1 coating machine in our company since 2011.
During the last years we did several coating trials with aqueous coating suspensions and solutions for orally dispersible films. We found the machine to be very suitable for small scale coating. The coating pattern is good and the drying capacity is sufficient.

Munich, 20.01.2016
